AUDIT ID

BR-2605-ZOSM
prepared by BAAM Studio

Average businesses become *hot and popular* by
building reviews relentlessly.

Excellent businesses become *invisible* because they ignore them.

§ 01 WHY REVIEWS DECIDE WHO WINS

The rules of getting found *changed*.

Five things that are now true about local search — each measured, each cited, none arguable.

01

16–20%

Of Google's Local Pack ranking weight now comes from review signals — up from ~11% five years ago. The share rises every year.

WHITESPARK • 2026 LOCAL RANKING FACTORS

02

81%

Of consumers use Google for local reviews. It's the only major platform whose usage is rising — Yelp, Facebook, and BBB are all declining.

BRIGHTLOCAL • 2026 LOCAL CONSUMER REVIEW SURVEY

03

+25%

Conversion lift from a single 0.1-star rating increase in brick-and-mortar businesses. The 4.0 threshold is binary — 70% of consumers filter by it.

UBERALL • VIA BRIGHTLOCAL

04

5–9%

Revenue increase per 1-star rating bump. Causal, not correlational. Independent businesses see the upper end of this range; medical and legal even higher.

LUCA • HARVARD BUSINESS SCHOOL

05

AI search now reads your reviews.

ChatGPT, Perplexity, Claude, and Google's AI Overviews pull directly from review content and ratings to answer "best [service] near me" questions. Without strong reviews, AI will literally not mention you when a customer asks.

*Excellence isn't enough anymore. **Visibility** decides who walks
through your door.*

§ 02 YOUR CURRENT SNAPSHOT

Where customers *actually look* for you.

Free tier covers Google — by itself ~81% of local consumer reach. The paid audit adds Yelp, Facebook, Zocdoc, Healthgrades.

METHODOLOGY

Every score is measured against published vertical benchmarks. **Rating Quality** uses a non-linear curve that rewards the 4.0★ threshold (where 70% of consumers filter). **Review Volume** compares total count to the median for your vertical.

Velocity scores use BAAM Review Research healthy-pace bands. The black tick marks on each bar show where these standards sit on the 0–100 scale. [Full methodology →](#)

*The drag on your score is **velocity** — and velocity is what you can change starting Monday.*

§ 03.5 • THE FORECAST

Your score in *six months* if you do nothing.

Three forces work against a business that stops collecting reviews: velocity decay (mechanical), ranking decline (Sterling Sky), and competitors compounding the gap. This projection holds your current effort constant — and holds your competitors at their measured pace.

Numbers from the BAAM Review Research brief, applied to your specific category.

§ 04A · PER-REVIEW DOLLAR VALUE

One strong Google review is worth, for a TCM Clinic...

\$1,400

range: \$400 — \$2,400 · 24-month horizon

Value compounds across three channels — Google search ranking, on-site widget trust, and friend-to-friend referral. The median per-review value for your vertical is **\$1,400**, with a typical range of **\$400 — \$2,400**.

YOU · 7.0/MO

Per BrightLocal, only **9% of businesses** sustain the Optimal pace — the band Google's ranking algorithm actually rewards.

Your market is sleeping — competitors average *0.0 reviews/month*, you're at *7.0*. The first business to consistently collect reviews wins this market outright.

OBSERVED *You're outpacing every competitor in this market by 30-day velocity — that lead is your moat. Sustain it.*

Good news: you're better than 2 of 5 competitors in your area today. Harder news: by Q4, you'll be better than fewer if nothing changes.
