§ 02 YOUR CURRENT SNAPSHOT

Where customers *actually look* for you.

PLATFORM	RATING	REVIEWS	LAST REVIEW	PROFILE HEALTH
Google Business Profile	 5.0	76	-1 days ago	 80%

What this means

*Your most recent Google review was -1 days ago. Your total of **76** reviews is below the median for your vertical — volume is your weakest area.*

89 /100

GRADE · TIER B

B

Strong — but losing ground to top competitors month over month.

THE FULL SCALE • WHERE EACH GRADE SITS

Your **B** in context — and what it would take to climb.

SCORE RANGE	GRADE	WHAT IT MEANS IN PLAIN ENGLISH
90 - 100	A	Winning your local market. Reviews are a competitive moat.
75 - 89	B	Strong — but losing ground to top competitors month over month. YOU • 89
60 - 74	C	Visible — but customers are choosing competitors with stronger reviews.
40 - 59	D	Bleeding customers to better-reviewed competitors every week.
0 - 39	F	Effectively invisible. Search and AI are skipping you entirely.

METHODOLOGY

Every score is measured against published vertical benchmarks. **Rating Quality** uses a non-linear curve that rewards the 4.0★ threshold (where 70% of consumers filter). **Review Volume** compares total count to the median for your vertical. **Velocity** scores use BAAM Review Research healthy-pace bands. The black tick marks on each bar show where these standards sit on the 0–100 scale. [Full methodology →](#)

This loss is preventable. *Most clients starting at your grade reach the next grade up within 90–120 days of BAAM Review Service. See § Service Opportunity below for the projection.*
