Every score is measured against published vertical benchmarks. **Rating Quality** uses a non-linear curve that rewards the 4.0★ threshold (where 70% of consumers filter). **Review Volume** compares total count to the median for your vertical. **Velocity** scores use BAAM Review Research healthy-pace bands. The black tick marks on each bar show where these standards sit on the 0–100 scale. [Full methodology →](#)

This loss is preventable. *Most clients starting at your grade reach the next grade up within 90–120 days of BAAM Review Service. See § Service Opportunity below for the projection.*
